ABSTRACT

This document is an inventory of the 2000 and 2034 socioeconomic data for the region's transportation analysis zones (TAZ's). The area covered is the Hampton Roads MPO transportation study area. This data will be used in the region's travel demand forecast model, with the 2000 data used for model validation and the 2034 data used in the development of the 2034 Long-Range Transportation Plan.

ACKNOWLEDGEMENTS

Prepared in cooperation with the U.S. Department of Transportation (USDOT), the Federal Highway Administration (FHWA), and the Virginia Department of Transportation (VDOT). The contents of this report reflect the views of the Hampton Roads Metropolitan Planning Organization (MPO). The Hampton Roads Planning District Commission (HRPDC) is responsible for the facts and the accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the FHWA, VDOT, or HRPDC. This report does not constitute a standard, specification, or regulation. FHWA or VDOT acceptance of this report as evidence of fulfillment of the objectives of this planning study does not constitute endorsement/approval of the need for any recommended improvements nor does it constitute the approval of their location and design or a commitment to fund any such improvements. Additional project level environmental impact assessments and/or studies of alternatives may be necessary.

INTRODUCTION

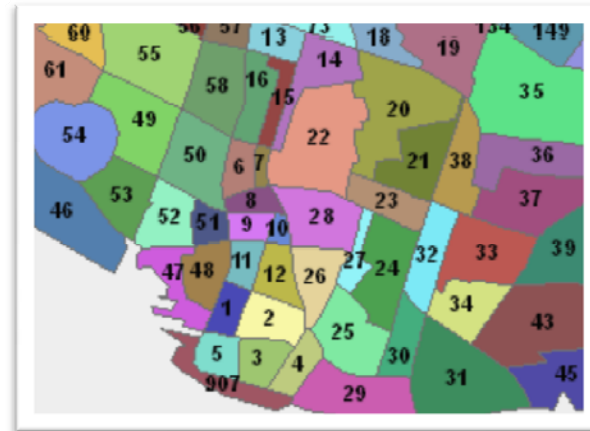

DOCUMENT PURPOSE

This report is a reference document of the socioeconomic data for the region's transportation analysis zones (TAZs) and describes the methods and assumptions used to develop future year 2034 socioeconomic data at the TAZ level for the Hampton Roads region. The HRPDC document "Hampton Roads 2000 Transportation Analysis Zones," (report #T01-07) is a good companion document with maps of the region's TAZ's.

BACKGROUND

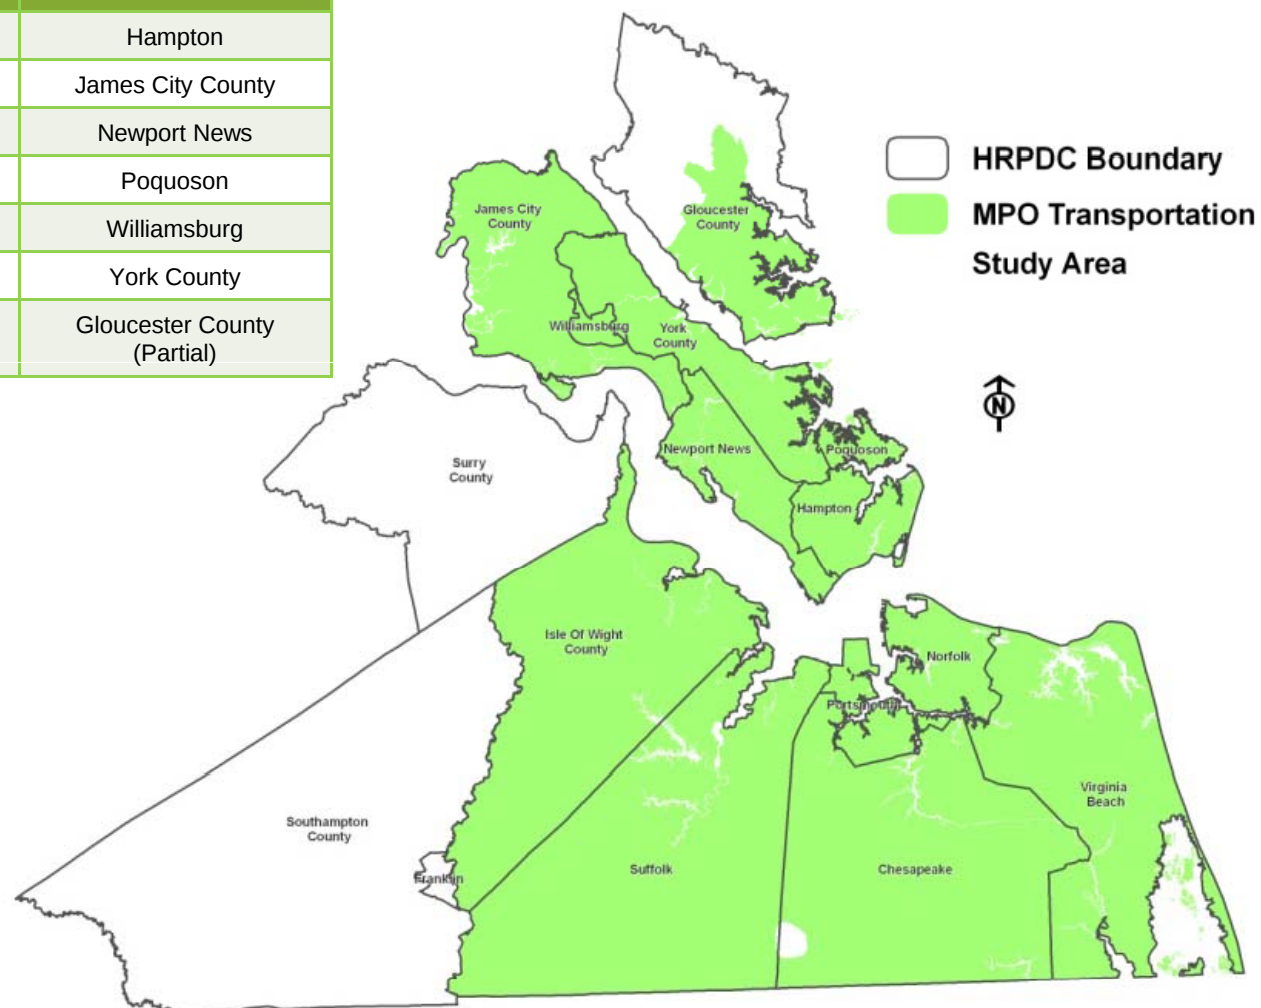

Socioeconomic forecasting and allocation to the TAZ level is conducted as part of the process of developing the Long-Range Transportation Plan. The travel demand model, a computer program designed to simulate travel, utilizes socioeconomic data (households, population, auto ownership, workers, and employment) at the TAZ level to estimate traffic volumes and patterns in an effort to identify current and future deficiencies in the transportation network. These results can then be used to identify where transportation improvements are needed within the region.

Traffic analysis zones (TAZs) are the base geographical unit of analysis for the model.

ALLOCATION PROCESS TO TAZs

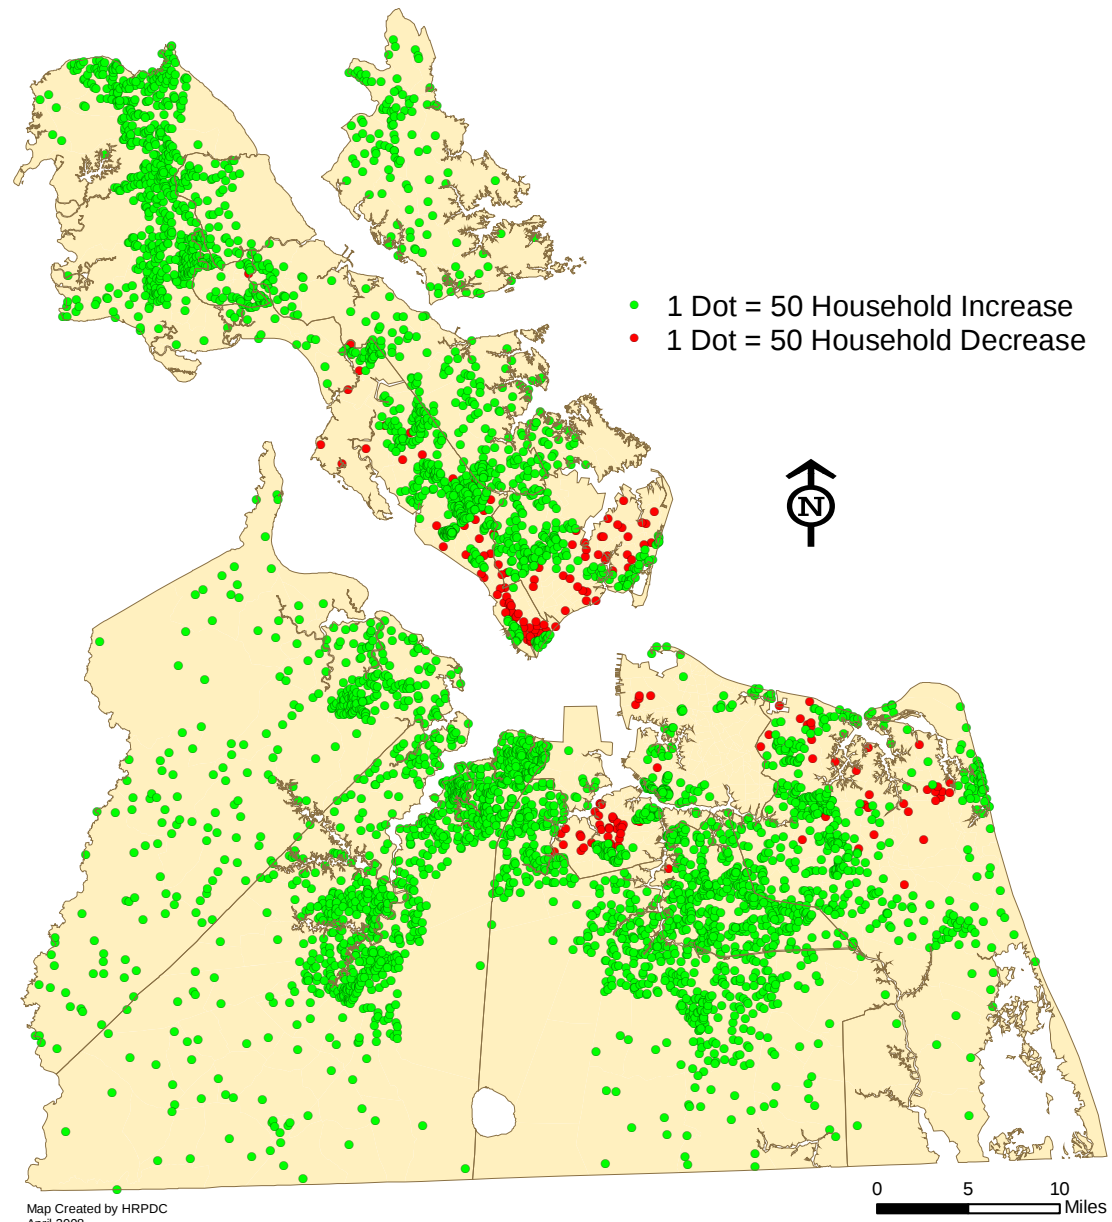

The process for developing socioeconomic data at the TAZ level began with the 2034 forecast for Hampton Roads. The 2034 forecast for the region was developed by HRPDC staff and approved by the Hampton Roads MPO in June of 2007. Control totals for Households, Total Employment, and Retail Employment were distributed to each jurisdiction. Staff from each locality then allocated these control totals to their respective TAZs. HRPDC staff utilized these TAZ allocations to calculate the remaining socioeconomic TAZ totals for Population, Passenger Vehicles, Non-Retail Employment, and Workers.

Note: The Census Bureau revised the 2000 population in Newport News from 180,150 to 180,697 in December 2003 (an increase of 0.3%).
The households in 2000 were also revised, from 74,117 to 74,367 (an increase of 0.3%).
The data in the table above reflects the data used in the validation of the region's travel demand forecasting model.

2000 AND 2034 SOCIOECONOMIC DATA BY TAZ

CHESAPEAKE 2000 AND 2034 TAZ DATA

NOTES: TAZ's with "N/P" in the employment column cannot have their 2000 employment data disclosed due to VEC regulations.
Data is sorted by TAZ number.

See the HRPDC publication "Hampton Roads 2000 Transportation Analysis Zones" for maps of the TAZ's.

DATA SOURCES

2000 DATA

2000 Population – Control totals and TAZ allocations from 2000 Census (Summary File 1, field P0010001)

2000 Households – Control totals and TAZ allocations from 2000 Census (Summary File 1, field H0130001)

2000 Passenger vehicle registrations – Locality control totals from “Hampton Roads Data Book”, June 2001 (HRPDC publication E01-02). TAZ allocations estimated using 1990 Census Block household automobiles per household and an allocation of automobiles per person in non-institutionalized group quarters as guides.

2000 Workers by place of residence - Control totals estimated. TAZ allocations estimated using 1990 Census Block workers per person as a guide.

2000 Total employment – sum of 2000 retail and non-retail employment.

2000 Retail and Non-retail employment – Control totals estimated from 1999 BEA employment. TAZ allocations are from a combination of geocoding 2000 ES-202 records from the VEC for “covered” employment, supplemented with BEA data for the remaining portion of the workforce.

2034 DATA

2034 control totals – All control totals are from forecasts approved by the Hampton Roads MPO in June 2007.

2034 TAZ allocations were calculated as follows, then adjusted to match control totals:

2034 Population – $[(2000 \text{ household pop per household}) * (2034 \text{ Households})] + (2000 \text{ group quarters population})$

2034 Households – allocated by staff of each locality

2034 Passenger Vehicle Registrations – $(2000 \text{ passenger vehicles per person}) * (2034 \text{ Population})$

2034 Workers by Place of Residence – $(2000 \text{ workers per capita}) * (2034 \text{ Population})$

2034 Total Employment – allocated by staff of each locality

2034 Retail Employment – allocated by staff of each locality

2034 Non-Retail Employment – difference between 2034 Total Employment and 2034 Retail Employment
